IMPORTANT FUNDING INFORMATION

The amount of federal funds available for reimbursement for a project will be capped at the MVRPC Board approved amount. It is expected that all cost estimates will be reliable, well researched, inflated to year of expenditure and not expected to increase. In addition, cost estimates must be certified by a professional engineer, architect or appropriate professional discipline. When compiling cost estimates, please take into consideration that there can be significant costs associated with compliance of federal regulations. Failure to account for such costs may result in your application's approval with insufficient funds to enable the project to be realized. All cost overruns realized at bid opening will be the sole responsibility of the project sponsor. Once approved, a project's scope can not be changed without the Board's approval.

In order to correctly fill out the funding tables below, begin by filling out the Total \$ for each phase. Then take that number and apply the desired Federal % of funding you are seeking (must be a whole number). The result is then entered in the cell for Federal \$. Continue across the row in the same manner to complete the Local % and Local \$ figures.
